Education

Vellore Institute of Technology	Jul 2026 (Expected)
B.Tech in Computer Science & Engineering	CGPA: 8.44 / 10.0
DAV Public School, Dudhichua	2019–2021
Senior Secondary (Class XII)	CGPA: 9.20 / 10.0
DAV Public School, Surya Vihar	2018–2019
Secondary (Class X)	CGPA: 9.60 / 10.0

Technical Skills

Full Stack Development: React.js, Node.js, Express.js, **TypeScript**, JavaScript (ES6+), HTML5, CSS3, Tailwind
GenAI & AI Integration: Prompt Engineering , LLM Orchestration (**Gemini, GPT-4, Llama 3**), OpenRouter API
Backend & Systems: Python (**FastAPI/Pandas**), MongoDB Atlas, PostgreSQL, **REST API Design**, JWT, RBAC
Reliability & DevOps: **92% Test Coverage (Jest)**, Git/GitHub, Docker, Postman, Vercel/Render, Agile/Scrum
Core Engineering: Data Structures & Algorithms (**DSA**), OOP, **Asynchronous Programming**, Technical Documentation

Projects

- ProjectHub — AI-Enabled Lifecycle Platform** | *React, TypeScript, Node.js, Gemini API* [\[Link\]](#)
- Developed a production-grade **MERN application with TypeScript**, managing the full SDLC from requirement analysis to cloud deployment on Vercel and Render.
 - Integrated an **Automated AI Analysis Engine** using structured LLM prompts to validate academic document compliance against predefined standards with 90% accuracy.
 - Built a secure **REST API with 15+ endpoints**, resolving critical production networking issues (IPv4/IPv6 conflicts) to ensure 100% system availability.
- English-Tutor-AI — Multi-Model AI Orchestration** | *Node.js, Socket.io, OpenRouter Multi-LLM* [\[Link\]](#)
- Engineered a **dynamic routing system** between GPT-4o, Claude 3.5, and Gemini based on task complexity, optimizing for both cost-efficiency and response accuracy.
 - Built a real-time communication layer using **Socket.io**, achieving sub-300ms latency for voice-to-text AI interactions and instant feedback cycles.
 - Applied **Few-Shot learning and System Prompting** techniques to achieve 95% task-specific accuracy in complex language tutoring scenarios.
- FinPath AI — Conversational Financial Intelligence** | *Python (FastAPI), Groq Llama-3, React* [\[Link\]](#)
- Engineered a high-performance Python backend using **FastAPI** to orchestrate Llama-3 models for real-time, sub-second latency financial profiling and user risk assessment.
 - Optimized **AI Inference Latency by 68%** through advanced prompt engineering, enforcing strict JSON schema outputs to ensure deterministic data flow for downstream analytics.
 - Implemented **Asynchronous Request Handling** and session persistence using FastAPI and MongoDB to manage concurrent LLM calls, mirroring enterprise production standards.

Experience & Leadership

- CatCatchCode (Technical Services & AI Publication)** Jul 2025 – Present
Co-Founder & Technical Lead Singrauli, MP
- Directing an **Agile engineering team** to deliver 10+ production web applications, managing the full SDLC from system architecture to cloud deployment via GitHub Actions.
 - Authored and published **”Steal This AI Prompt”** (Amazon), a technical guide on **Prompt Engineering** and enforcing structured JSON outputs for LLM-integrated applications.
 - Mentored 100+ developers on **Full-Stack best practices** and GenAI integration, producing technical documentation and code walkthroughs for scalable MERN architectures.
 - Architected a multi-channel digital ecosystem, utilizing **Data Analytics** to track user engagement and optimize platform performance for 100+ global learners.

Certifications

- Python Essentials (VIT)** — May 2024 [\[Link\]](#)
MERN Full Stack Certificate — Apr 2025 [\[Link\]](#)
