Education

Vellore Institute of Technology B.Tech in Computer Science & Engineering	Jul 2026 (Expected) CGPA: 8.44 / 10.0
DAV Public School, Dudhichua Senior Secondary (Class XII)	2019–2021 CGPA: 9.20 / 10.0
DAV Public School, Surya Vihar Secondary (Class X)	2018–2019 CGPA: 9.60 / 10.0

Technical Skills

Systems & Networks: Linux/Unix Administration, Computer Networks (TCP/IP, HTTP/S, DNS), OS Fundamentals
FinTech & Security: JWT Authentication, Role-Based Access Control (RBAC), Rate Limiting, ACID Properties
Backend & Data: Node.js, Python (FastAPI), REST API Design, SQL/PostgreSQL, MongoDB (Aggregation)
Reliability & Ops: Log Analysis, Root-Cause Debugging, Docker, CI/CD (GitHub Actions), Unit Testing
Integration & Tools: API Gateway Concepts, Shell Scripting, Postman, Git/GitHub, Microservices Architecture

Projects

- ParkEasy — Real-Time Transaction & Reservation System** | *MERN, JWT, ACID Compliance* [\[Link\]](#)
- Engineered a real-time reservation platform handling concurrent booking transactions with **Mongoose strict schema validation** to ensure 100% data integrity and prevent double-booking.
 - Implemented secure **JWT Authentication and Context-based session management**, mirroring the security protocols required for mobile wallet and digital payment applications.
 - Designed robust **RESTful APIs with comprehensive error handling** and transaction rollback logic to maintain system consistency during network interruptions.
- Rately — Multi-Tenant Secure Enterprise Infrastructure** | *Node.js, RBAC, Rate Limiting* [\[Link\]](#)
- Architected a scalable multi-tenant backend with **Role-Based Access Control (RBAC)**, ensuring strict data isolation between Admin, Owner, and User tiers—a core requirement for financial platforms.
 - Integrated **security hardening using Helmet.js and Rate Limiting** to protect transaction-heavy endpoints against DDoS attacks and unauthorized brute-force attempts.
 - Optimized **Database Aggregation pipelines** to handle real-time analytics and reporting, ensuring high-speed data retrieval for financial-style dashboards.
- ProjectHub — Secure API Orchestration & Reliability** | *TypeScript, REST APIs, Linux/Unix Ops* [\[Link\]](#)
- Developed a production-grade system with **15+ secure RESTful endpoints**, utilizing TypeScript for type-safety to reduce runtime errors and ensure mission-critical system reliability.
 - Resolved **complex production bottlenecks** including IPv4/IPv6 networking conflicts and authentication header misconfigurations via **Linux terminal log analysis**.
 - Implemented an automated validation engine using structured AI prompts to verify data compliance, demonstrating the ability to integrate **AI/ML-enabled automation** into financial workflows.

Experience & Leadership

- CatCatchCode** Jul 2025 – Present
Co-Founder & Systems Lead (Agile Operations) Singrauli, MP
- Directed a cross-functional Agile team to engineer a high-availability ed-tech ecosystem for 1,000+ users, prioritizing backend reliability and secure API orchestration.
 - Established software engineering best practices including Git-based version control, CI/CD pipelines, and technical documentation to ensure long-term system stability.
 - Optimized platform performance using **log analysis and performance tuning** to maintain 99.9% uptime during high-concurrency mentorship sessions.
- Satsang Vachan Satsang Seva** Sept 2025 – Present
Co-Founder & Project Lead (Data Systems & Scaling) Singrauli, MP
- Architected a scalable digital platform to manage and preserve archival data for a global community of **200M+ followers** using high-availability system design.
 - Implemented **Python-based data pipelines** and AI-assisted summarization to automate the transformation of massive datasets into accessible multimedia formats.
 - Managed the full project lifecycle, coordinating with global contributors to ensure system configuration, troubleshooting, and **secure live deployments**.

Certifications

- MERN Full Stack Certificate** — Apr 2025 [\[Link\]](#)
Python Quick Start (LinkedIn Learning) — Jan 2023 [\[Link\]](#)
