Education

Vellore Institute of Technology B.Tech in Computer Science & Engineering	Jul 2026 (Expected) CGPA: 8.44 / 10.0
DAV Public School, Dudhichua Senior Secondary (Class XII)	2019–2021 CGPA: 9.20 / 10.0
DAV Public School, Surya Vihar Secondary (Class X)	2018–2019 CGPA: 9.60 / 10.0

Technical Skills

QA & Testing: Manual Testing, Regression & Sanity Testing, UAT, Test Case Design, Bug Lifecycle
API & DB Testing: Postman (API Validation), JSON Schema, **SQL (Data Integrity Testing)**, MongoDB
Methodologies: SDLC, STLC, Agile/Scrum, Root-Cause Analysis (RCA), Technical Documentation
Tools & Debugging: Chrome DevTools (Console/Network Tracing), GitHub Issues, Jira (Familiarity), Git
Technical Literacy: JavaScript, Python, C++, MERN Stack, RESTful APIs, JWT (Security Validation)

Projects

- ProjectHub — Student Project Lifecycle System** | *Manual Testing, Postman* [\[Link\]](#)
- Managed the **End-to-End SDLC**, executing 50+ manual test cases for Student/Faculty workflows including document submission, approval states, and role-based access.
 - Performed **Integration Testing** on 15+ REST API endpoints using **Postman**; validated HTTP status codes, JSON schema accuracy, and authentication header behavior.
 - Conducted **Root Cause Analysis (RCA)** to resolve critical production defects, including IPv4/IPv6 localhost conflicts and Auth-header misconfigurations.
 - Validated AI-driven PDF analysis logic through **Boundary Value Analysis**, ensuring 100% compliance with academic formatting standards.
- Rately — Multi-Tenant Enterprise Platform** | *Security & RBAC Testing* [\[Link\]](#)
- Designed and executed **Security Test Scenarios** for Role-Based Access Control (RBAC), ensuring strict data isolation across Admin, Store Owner, and User tiers.
 - Validated system resilience via **Negative Testing** on Rate Limiting and Helmet.js configurations to prevent unauthorized access and simulate DDoS conditions.
 - Performed **Sanity and Regression Testing** post-deployment to verify that high-concurrency multi-tenant features remained stable across environment updates.
- Satsang Seva — Digital Preservation & Quality Control** | *Validation Lead* [\[Link\]](#)
- Established a **Structured Validation Workflow** for the digitization of 50+ years of archival data, enforcing 100% data integrity and formatting accuracy.
 - Directed a distributed team of contributors, performing **Quality Audits** to ensure all digital outputs met predefined "Definition of Done" (DoD) benchmarks.
 - Managed **Defect Tracking** for digitization errors; assigned targets and conducted regular status reviews to resolve blockers and maintain release timelines.
 - Implemented **Sampling-based Verification** to identify systematic inconsistencies, significantly reducing re-work rates through early-stage error detection.

Experience / Leadership – Achievements

- CatCatchCode** catcatchcode.online – **Jul 2025 – Present** [\[Link\]](#)
- Co-Founder & Engineering Quality Lead — VIT
- Directing a technical initiative within an **Agile environment**, leading a 2-member team through daily stand-ups and sprint reviews to deliver high-quality educational products.
 - Managed the **Quality Assurance (QA) pipeline** for 100+ technical modules, performing manual audits to ensure content accuracy and functional alignment with student requirements.
 - Implemented a **Structured Feedback & Defect Loop**, identifying and resolving inconsistencies in learning roadmaps for DSA and AI automation before public release.
 - Coordinated **cross-functional communication** between content and technical development teams to reproduce and resolve platform issues, ensuring 100% user satisfaction.

Certifications

- Python Essentials (VIT)** — May 2024 [\[Link\]](#)
- MERN Full Stack Certificate** — Apr 2025 [\[Link\]](#)
