## Technical Skills

**Instructional Design:** Technical Scripting, Video Production (YouTube), **Technical Blogging**, SEO Copywriting  
**Technology Domains:** Generative AI (LLMs), Full Stack (MERN), Python, DevOps, Cloud, Cyber Security  
**Visual & Presentation:** PowerPoint (Advanced), Typography, Color Theory, Canva, Technical Diagramming  
**Engineering Foundations:** JavaScript, Python, C++, SQL, **DSA**, **OOP**, **DBMS**, RESTful APIs, Git/GitHub  
**Tools & Platforms:** YouTube Studio, Google Analytics, Postman, VS Code, Docker, Vercel, Markdown

## Projects & Case Studies

- ProjectHub — AI-Enabled Lifecycle Research** | *Full Stack, LLM Orchestration* [\[Link\]](#)
- Researched and implemented a **Document Intelligence pipeline** using Gemini AI to automate academic compliance audits; translated complex LLM logic into user-friendly technical documentation.
  - Developed a production-grade MERN system as a **technical case study**, documenting the resolution of critical infrastructure bottlenecks (IPv4/IPv6 conflicts) to educate learners on real-world debugging.
  - Designed a 15+ endpoint REST API architecture, creating **visual workflow diagrams** and "step-by-step" guides for role-based authentication and persistent storage integration.
- Excel Superstore Sales Dashboard** — *Advanced Excel, Pivot Tables, Slicers* [\[Link\]](#)
- Analyzed 10K+ sales rows using advanced Excel functions including **VLOOKUP**, **HLOOKUP**, & **Pivot Tables**.
  - Identified a **35% profit variance** across different categories and regions, enabling targeted strategic adjustments.
  - Performed rigorous data cleaning (duplicate removal) and built interactive dashboards with dynamic slicers.
- Rately — Multi-Tenant Architecture Case Study** | *React, Node.js, Security* [\[Link\]](#)
- Analyzed and implemented **Enterprise Security patterns** (RBAC, JWT, Rate Limiting), transforming the project into a comprehensive learning module on Web Security and DDoS mitigation.
  - Authored a series of **Technical Blogs** explaining the transition from monolithic to multi-tenant architectures, focusing on data isolation and schema normalization in MongoDB.
  - Designed high-fidelity **PowerPoint presentations** for technical walk-throughs, emphasizing UI/UX aesthetics and clean dashboard typography for Admins and Store Owners.

## Experience / Leadership – Achievements

- CatCatchCode** catcatchcode.online – Jul 2025 – Present
- Co-Founder & Technical Lead — VIT [\[Link\]](#)
- Founded an ed-tech initiative providing placement guidance, curated study material, and senior mentorship for students.
  - Led a 2-member team to produce 100+ technical learning videos, impacting 100+ students.
  - Designed beginner-to-intermediate learning roadmaps for DSA, Full-Stack development, and AI automation.
  - Expanded content across LinkedIn, YouTube, Instagram, and GitHub, building an early-stage learning community.

## Publications

- Steal This AI Prompt: Tools & Smart AI Hacks** | *Amazon Kindle* [\[Link\]](#)
- Authored a technical guide on **Prompt Engineering**, simplifying complex LLM workflows and AI automation for a global audience of 1,000+ potential learners.
  - Developed frameworks for **AI tool integration**, translating "deep-tech" capabilities into actionable educational content and high-value user roadmaps.
- Explain Like You Sell: Technical Storytelling** | *Upcoming* *In Progress*
- Designing a playbook on **Instructional Product Positioning**, focusing on how to communicate complex engineering logic through engaging B2B storytelling.
  - Synthesizing technical research with pedagogical psychology to create a "**Feature-to-Value**" methodology for educational content creators.

## Certifications

- Python Essentials** (VIT ) — May 2024 [\[Link\]](#)
- MERN Full Stack Certificate** — Apr 2025 [\[Link\]](#)
