Education

Vellore Institute of Technology B.Tech in Computer Science & Engineering	Jul 2026 (Expected) CGPA: 8.44 / 10.0
DAV Public School, Dudhichua Senior Secondary (Class XII)	2019–2021 CGPA: 9.20 / 10.0
DAV Public School, Surya Vihar Secondary (Class X)	2018–2019 CGPA: 9.60 / 10.0

Technical Skills

AI & Computer Vision: OpenCV (Image Preprocessing, Contours, Thresholding), OCR (PaddleOCR/Tesseract), Object Detection (YOLO), PDF Data Extraction

Machine Learning & NLP: Python, NumPy, Pandas, Scikit-Learn, PyTorch (Foundations), Statistics & Probability, Text Classification

Production Engineering: Modular Python Development, FastAPI, Flask, RESTful APIs, Pydantic (Data Validation), MLOps basics

Core CS & SDLC: (DSA), Time Complexity Analysis, OOP, Git (Version Control), Docker, CI/CD, Unit Testing

Productivity & Tools: Prompt Engineering (Structured JSON), Multi-Model LLM Orchestration (GPT-4/Claude/Gemini), Postman, Linux/Bash

AI & Product Engineering

- FinPath AI — Conversational Financial Intelligence** | *Python (FastAPI), Groq Llama-3, React* [\[Link\]](#)
- Engineered a high-performance modular Python backend using FastAPI to orchestrate Llama-3 models for real-time (sub-second latency) financial profiling.
 - Optimized AI Inference Latency by 68% through structured prompt engineering, ensuring consistent JSON outputs for downstream analytics and scoring.
 - Implemented Asynchronous API Handling and session persistence to manage concurrent AI model requests, mirroring production-ready enterprise standards.
- ProjectHub — AI-Powered PDF Compliance Engine** | *Python, pdf-parse, GPT-4, MongoDB* [\[Link\]](#)
- Developed a Document Intelligence pipeline to extract and validate structural data from complex PDFs, analogous to Karomi's artwork compliance verification.
 - Built custom text-extraction logic to handle malformed PDF layers and unstructured text, achieving a 90% accuracy rate in automated document audits.
 - Integrated a 6-parameter scoring rubric (Alignment, Formatting, Content) using NLP-based classification to automate the quality control lifecycle.
- Satsang Vachan — Vision & Image Restoration Pipeline** | *Python, OpenCV, OCR, LLMs* [\[Link\]](#)
- Spearheaded a digitization initiative utilizing OpenCV for image preprocessing (Gaussian Blur, Adaptive Thresholding, Canny Edge Detection) to restore 50+ years of archival literature.
 - Architected an OCR & NLP pipeline to convert unstructured visual data into searchable digital formats, ensuring high data integrity for a global community of 200M+ users.
 - Applied Image Summarization techniques to transform high-density visual content into concise, accessible formats using deep learning-based text-analysis tools.

Experience / Leadership – Achievements

- CatCatchCode** [catcatchcode.online](#) – Jul 2025 – Present [\[Link\]](#)
- Founder & Technical Lead — VIT
- Founded an ed-tech initiative providing placement guidance, curated study material, and senior mentorship for students.
 - Led a 5-member team to produce 100+ technical learning videos, impacting 100+ students.
 - Designed beginner-to-intermediate learning roadmaps for DSA, Full-Stack development, and AI automation.
 - Expanded content across LinkedIn, YouTube, Instagram, and GitHub, building an early-stage learning community.
- Satsang Vachan Satsang Seva** [satsangvachansatsangseva.online](#) – Sept 2025 – Present [\[Link\]](#)
- Co-Founder & Project Lead – Digital Preservation & Social Impact Initiative
- Leading a digital preservation initiative to convert decades of archival literature into modern visual and multimedia formats.
 - Spearheading a digitization initiative to preserve 50+ years of archival literature for a global community of 200 Million+ followers.
 - Collaborating with contributors to produce posters, magazines, podcasts, and animated content for large-scale audiences.
 - Applying AI-assisted summarization to transform long-form textual material into concise, accessible visuals.
 - Designing a scalable content platform focused on accessibility, maintainability, and positive social impact.

Certifications

- Python Essentials** (VIT) — May 2024 [\[Link\]](#)
- MERN Full Stack Certificate** — Apr 2025 [\[Link\]](#)
